

Algebraic Terminology

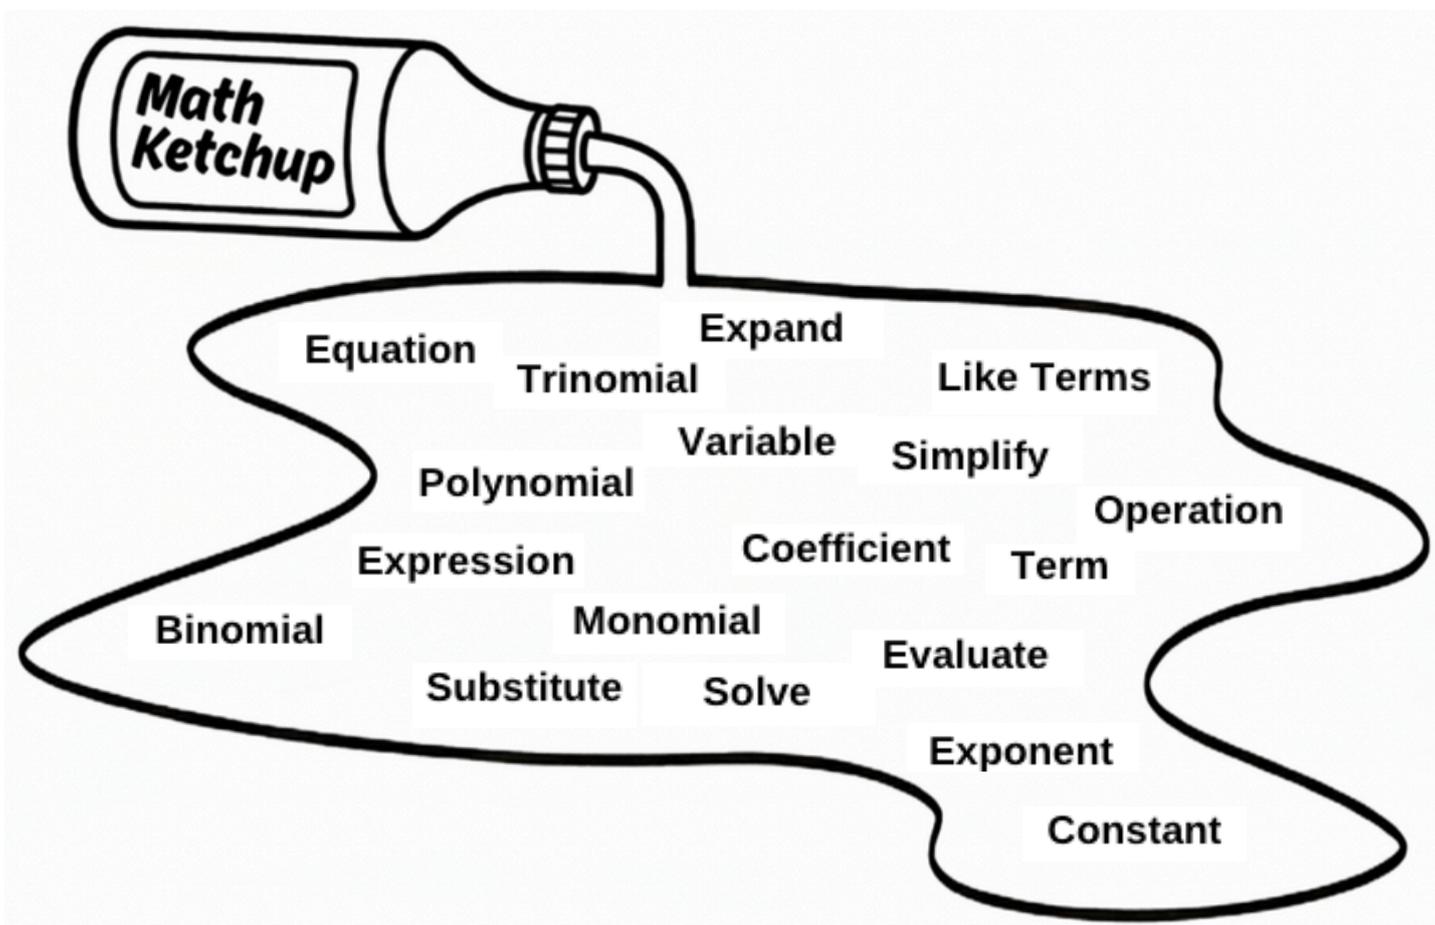

Level 1 - Match algebraic terms with their definitions using provided examples

Level 2 - Match algebraic terms with their definitions without examples.

Algebra is like its own language, and every language has vocabulary words.

In algebra, these “words” are called **terms**. Knowing what each word means helps you understand and solve problems.

Below are many of the terms we will see through out algebra journey.

In the first activity we will try to match these terms to their definitions.
