

Solving Systems of Linear Equations (Elimination)

scan for answers

Chapter 5: Worksheet 3

Level 1 - Solve the system by adding or subtracting the equations

Level 2 - Multiply one of the equations by a number and solve by elimination

Level 1

Solve for the unknown variables in these systems of linear equations.

a) $\begin{cases} x - y = 11 \\ 2x + y = 19 \end{cases}$	b)	c)
--	----	----

Level 2

Solve for the unknown variables in these systems of linear equations.

a) $\begin{cases} x + 2y = 20 \\ 2x + y = 19 \end{cases}$	b)	c)
---	----	----
